DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on 6/12/02 have been fully considered but they are not persuasive. .

In regards to applicant's argument about Levran et al. does not disclose an inverter based active filter. Examiner like to point out the similarity of the circuit structure of the applicant's figure 2 and cited Levran et al's patent figure 1, and column 2, line 55-60, column 3, line 1-20). Similarly Bhattacharya et al.'s reference column 3, line 60-70+ clearly match with figure 1 of the instant application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2838

3. Claims 1-17 and 26-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Levran et al. (U.S. Patent # 5,047,910).

Levran et al. discloses claimed invention a power distribution system comprising: an AC power source; a power bus connected to the AC power source; a capacitor bank shunt-connected to the power bus; the active filter including an inverter, an inverter control and current sensors, each current sensor sensing current flowing through a corresponding capacitor of the capacitor bank, the inverter control, in response to the current sensors, controlling the inverter to inject harmonic current into the power bus (figure 1, and column line, 40-70).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 18-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gunnarsson et al. (U.S. Patent # 6,115,269) in combination with Bhattacharya et al. (U.S. Patent # 5,513,090).

Art Unit: 2838

Gunnarsson et al. discloses claimed invention an active filter (figure 1-5), except the utilization of technique for controlling the injecting inverter to inject harmonic currents into the power bus. Bhattacharya et al. teaches the utilization of technique for controlling the injecting inverter to inject harmonic currents into the power bus column 9, line 1-10). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Gunnarsson et al.'s reference converter circuit by utilizing the technique of Bhattacharya et al.'s teaching for the purpose of providing a hybrid series active, parallel passive, power conditioner for unbalanced load, passive filter and source conditions.

Other Prior Art Cited

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. DeDoncker (U.S. Patent # 5,648,894), Peterson et al. (U.S. Patent # 4,053,820), Gyugyi et al. (U.S. Patent # 5,198,746) Henniger et al. (U.S. Patent # 3,935,551) and Takeda et al. (U.S. Patent # 4,812,669).

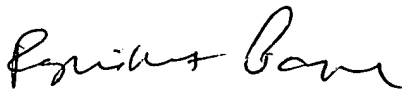

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2838

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
